

**Robotic
Application**

```
graph TD; RA[Robotic Application] --- MR[Middleware for Robots]; T[Tools] --- MR; OA[Other Applications] --- MR; MR --- OS[Operating System]; OS --- RCH[Robot/Computer Hardware];
```

The diagram illustrates a layered architecture for a robotic system. At the base is the 'Robot/Computer Hardware' layer, represented by a light gray rectangle. Above this is the 'Operating System' layer, a white rectangle. The 'Middleware for Robots' layer is shown as a gray rectangle that is wider than the OS layer and narrower than the hardware layer. On top of the middleware, three application layers are shown: 'Robotic Application' (a white oval on the left), 'Tools' (a white oval in the center), and 'Other Applications' (a white oval on the right). All text is in bold black font.
